

BUCKETS

1

Fill bucket with water
up to 5 litres

3

Mix well to ensure fully
dissolved

2

Add the product sachet
to the water

4

Apply as appropriate

The concentrate powder in the sachet is wrapped in water soluble film to prevent contact. Once diluted the product carries no hazard.

Only handle sachets with dry hands. If a sachet is damaged, only handle with the correct PPE to avoid contact with skin.

Pod pro products are designed for professional use only. Always read the MSDS Safety Data Sheet.

TRIGGER SPRAYS

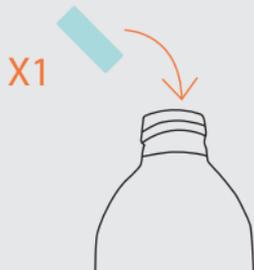

1

Fill the bottle with water to the fill line (500ml)

2

Add PodPro sachet to the trigger spray bottle

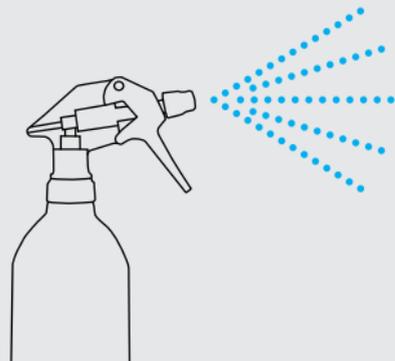

3

Replace trigger head and shake the bottle until fully dissolved

4

Spray onto surface and apply as necessary. Wipe with clean cloth or allow to dry.
